

Peduli Anak Foundation
Counselor's Quarterly Report

Name	Syafaatullah
Date and Place of Birth	Sayang-Sayang, 10 December 1996
Mentor	Indri Widiyarsi S.Pd
Evaluation Time	April – June 2015
Class	11 Senior High School
Child ID	PA-A0067

Physical Condition

Syafaat's physical condition is good during the past three months. Although he was fasting for a month, his physical condition was still good and he didn't get sick. His height is 160cm and his weight is 49kg. He is able to arrange his rest time well. He has no problems with his eyes anymore, but still has a control check up by a doctor once a month, and gets vitamin supplements for his eyes. Syafaat always looks clean and neat because he can take care of himself well.

Mental Condition

Syafaat has become wiser in every aspect. He tries to solve his own problems before involving others. He also can control his emotions such as sadness by keeping his focus on his job training. Syafaat does not really open up about his feelings and he never complains about his life either. He is still good and polite towards everyone else.

Once a week, he comes to the foundation to help out with the younger children or help out the counselors at the shelter.

Social Interaction

Syafaat's social interaction is good with people in his village, at school, and also people in his internship's place. He often helps teens to participate in building the mosque or cleaning the gutter around the village on Sundays.

At school and at the Clinic where he does his internship, Syafaat is well known as diligent, polite and respectful to his elders. He has a lot of friends who help him go with him to school at the foundation.

Educational Development

Syafaat's educational development is good in this semester because he is able to surpass the standard scores in every subject. Syafaat can make medicine for babies for fever, cough and flu.

He likes the prescription lessons because from that subject, he will learn what kind of medicine is useful for human beings. His least favorite subject is Physics because he has difficulties in understanding the formula.

Family

Since his parents passed away, Syafaat lives by himself at home. Sometimes his brother comes and stays over night there. His other relatives live nearby so he still has family who looks after him and help him. He also spends couple days a week to stay at the foundation in order to report his progress and helps the counselors with the children.

Additional Information

Syafaat likes Pharmacy very much. He really wants to continue his studies to University and reach his dream as a Pharmacist in the future.
