

Peduli Anak Foundation
Counselor's Quarterly Report

Name	Rui Samsul Hadi
Place & Date of Birth	Torean, 16 March 2003
Mentor	Turmuzi, S.Pd
Evaluation Time	July – September 2015
Class	3 Primary School
Child ID	PA-A0133

Physical Condition

During the past three months, Rui started to care about the cleanliness of his body by diligently taking shower every day. He also did sports such as playing soccer and swimming.

Once Rui got ear pus, and he was taken to the doctor and still receives treatment for it. He sometimes got nosebleeds especially in the afternoon after playing soccer. The counsellor provides treatment by compressing his head with water and cleaning his nose.

His appetite has been good and he always adds to his portion every day. His weight is 32,2 kgs and he is 136 high. He is active in the morning and afternoon so he always sleeps on time at night.

On 14 September, Rui got the first vaccination injection for hepatitis B. On 23rd of September, Rui had to take anthelmintic drugs to destroy parasitic worms. This program is held regularly once a year to all the children of the foundation.

Mental Condition

Rui easily started to cry when his friends tease him or when they don't ask him to play with them. He looks very happy when playing soccer with his friends.

Rui is easily directed when the counselor asks him to do his daily chores and he has obeyed the rules of the foundation during the past three months.

Social Interaction

Rui has actively interacted with his friends, especially his peers. He easily gets along with them though he is a new kid in Peduli Anak. He never chooses a specific friend to play with. He also interacts well with older people such as counselor and other staff.

Starting in the middle of September, Rui joined Theraplay held by volunteer to help his immersion in Peduli Anak. He looks happy and relaxed when doing the activity. On 6 September, Rui went on a recreational trip to Kuta beach with all of his friends and staff. He was happy to play and swim with his friends at the beach.

Educational Development

Rui is making a slow progress at school. He often daydreams because he doesn't understand the lessons. He needs remedial class for reading and Math. In Indonesian language, Rui is still learning to speak Indonesian since he never used it before he came to the foundation. He speaks local language so it is hard for him to understand the people around him. After school, he follows the extra learning in shelter assisted by the counselor to improve his understanding.

Family

Rui went home for ten days and spent his holiday and celebrated the Eid Mubarak with his family. While in the past two months, he did not receive visits from his family.
