| <b>Physical Condition</b>  |                          |
| <p>Rahim diligently maintains the cleanliness of his body and his health by taking showers and brushing his teeth regularly and exercising in the evening. Rahim is active in the morning and afternoon and it helps him sleep on time at night. He has a good appetite and eats enough every day. His weight is 20 kg and his height is 62cm.</p> |                          |
| <b>Mental Condition</b>  |                          |
| <p>Rahim's mental condition has been good during the past three months because he has rarely cried. Rahim is a shy kid so he likes to play with his younger friends. He is obedient and always listening to the counselor.</p>   |                          |
| <b>Social Interaction</b>  |                          |
| <p>Rahim is getting more active playing with his new friend, Reza. He feels comfortable when playing with his younger friends because he is still afraid to communicate with the older children. He has good interaction with staff and the volunteers in the foundation. He is nice so the staff members likes him.</p>                           |                          |
| <b>Educational Development</b>   |                          |
| <p>Rahim just passed the semester exam and he got a nice score in English. He showed good progress in his educational development because he is willing to do all the tasks by himself. He has a good motivation to study and still needs to learn to keep his focus on the subjects.</p>  |                          |
| <b>Family</b>  |                          |
| <p>Rahim has not communicated with his mother during the past three months.</p>  |                          |
