<b>Evaluation Time</b>	<b>April- June 2015</b>
<b>Class</b>	<b>2 Primary School</b>
<b>Child ID</b>	<b>PA-A0111</b>

### **Physical Condition**

Supandi's physical condition was good during the past three months and he never got sick. His height is 146cm and his weight is 35kg. He always ate in big portion every day, he would add his portion when there was his favorite food in menu. Supandi actively did exercise such as playing soccer or jogging. He is also intrigued to learn yoga.

He was able to maintain the cleanliness of his body by taking shower and brushing his teeth regularly every day.

### **Mental Condition**

Supandi's mental condition was better than previous months because he was able to control his emotions well and was not moody. He looked happy when spending time with his friends in shelter. He also did not break the rules or had problems during the past three months.

### **Social Interaction**

Supandi's social interaction was good during the past three months. He had no problem with her friends or staff in the foundation. His interaction was good with the counselor, teacher and other staff. He kept studying in the shelter with the counselor and had opened his mind to them.

### **Educational Development**

Pandi's educational development was good for the last three months though he still needed to be asked by the counselor when studying in the shelter. His learning motivation was good at school. He can follow the learning process well in the classroom.

Pandi likes Civics subject because it is easy to understand, while his least favorite subject is Social Studies because his teacher gives too much task.

His score are: Religion(75), Civics(63), Indonesian Language(65), Mathematics(65), Science(70), Social Studies(75), Art& Culture(70), Sports(75), English(60), Computer(70), Drama (75).

### **Family**

Pandi communicated a lot with his family. They also came to the foundation and brought fruits for him and his friends in the foundation. He was happy when they were here with him.
