

Peduli Anak Foundation
Counselor's Quarterly Report

Name	Nurul Hidayah
Place & Date of Birth	Sumbawa, 9 January 2005
Mentor	Nur'aini
Evaluation Time	April- June 2015
Class	1 Primary School
Child ID	PA-A0092

Physical Condition

Nurul had fever once and got itchy, but the counselor immediately gave her treatment, so a few days later she was fine again. Nurul is 117,5cm high and her weight is 17,5 kg. Her appetite has been good and she has eaten big portions, she has never been picky about her food. Nurul still needed to be watched when she took her shower because she often did it too fast and wasn't clean enough.

Mental Condition

Nurul's mental condition has not changed much, she indeed often cried when there was something disturbing her. However, her mood in general is stable.

Social Interaction

Nurul has a few close friends and she feels comfortable with them. She easily interacts with new person. She likes to share stories with them and are always curious when there are new people coming to the foundation. She no longer played alone in the shelter and often played with her friends instead.

Educational Development

Nurul already passed semester exam and she had studied every day to prepare herself for that, and as a result, she was able to move to second grade next semester. Nurul is a child who has lower academic development compared to her friends in class, so the counselor always assisted her when she studied in the shelter after school and at night. Nurul still has weakness in Mathematics, even in a simple counting. She also needs to fix her writings. Nurul is still active in following the Art class activity once a week.

Family

Nurul still didn't meet her family/relatives during this period and there's no contact information of them.

Additional Information
