

Peduli Anak Foundation
Counselor's Quarterly Report

Name	Gilang Sandi Permana
Date and Place of Birth	Ampenan, 3 July 2003
Mentor	Nanang Mardianah, SPd
Evaluation Time	April - June 2015
Class	5 Primary School
Child ID	PA- A0072

Physical Condition

Gilang's physical condition has been good for the last three months, he has been healthy and never gets sick. His weight is 29kg and his height is 140cm. Gilang often jogs and plays basketball or soccer with his friends. Gilang's appetite has been good and he has been eating big portions every day. He is never picky about food and always finishes his food. His favorite food is fried chicken and plecting (Traditional spicy vegetables). Gilang always takes good care of his own cleanliness so he always looks clean and neat. He always uses cologne after shower.

Mental Condition

Gilang is usually in good mood, especially in the mornings and afternoons. He seems to be more mellow in the evenings, but that's more likely because of tired from having a long day full with activities at school and home. Gilang now is more open to his mentor, especially in seeking advice.

Social Interaction

Gilang's social interaction is very good in the foundation. He plays well with his friends and doesn't have any problems with them. Sometimes he teases his friends, but it has never caused serious problems like fighting.

He behaves well to the counselors and often helps his friends in running out the daily chores. Gilang also often helps the staff in cleaning the yard. He always obeys the rules of the

foundation and listens to the counselors.

In the middle of May, Gilang went on a recreation to Selong Belanak beach with all of his friends and the staff of Peduli Anak. He was very happy to play and swim with his friends at the beach.

Educational Development

Gilang goes to school on time and is never late. According to his homeroom teacher, Gilang's motivation is good and he understands well when the teacher explains the materials. Gilang likes Indonesian language because it is easy to understand. While Mathematics, he said that the questions in the exam were different from what his teacher had explained. That's why he had difficulties in answer it.

Gilang passed the semester exam in April but he got lower than usual scores in almost all the subjects. Therefore, he followed the remedial class to increase his scores. Gilang still joins the Art class taught by counselor and volunteer once a week.

Family

Gilang's family did not come for a visit to the foundation during this time period. Gilang rarely communicates with his family through the phone.
