### **Physical Condition**

Marni's physical condition is good. She had a good appetite and she has never got sick. Yet she got itchy and had red spot all over her body once. The counselor asked her to put powder on her body and she had medicine, and four days later it was gone. Her weight is 40kg and she is 151cm high.

### **Mental Condition**

Marni's mental condition hasn't been really good in April and May. In fact, she did not want to get along with her friends. This has caused her bad mood. She was getting better in June because she sorted out her problems with friends and counselor. She also looked cheerful and were willing to play with her friends again

### **Social Interaction**

Marni's social interaction was not really good in April and May, but in June it was getting better. She often played with her close friend, Ria. They often spent time together. Marni is not really close to volunteers because she is still too shy to talk to them.

### **Educational Development**

According to Marni, she is still shy when her teacher asks her to write the answer on the whiteboard in front of the class because she is afraid of making mistakes. Marni has a good learning motivation. She passed the semester exam in June and she passed the standard in all subjects. She will enter grade 11 next semester. Marni joins a Scout as her extracurricular activity and gets a satisfying grade from it. Marni likes Sewing, IT and Basic Pattern subjects. The subject she likes the less is Mathematics, because it is hard to understand. Marni has never

made problem at school because she is well known as a nice and shy girl.

### **Family**

For the last three months, Marni have communicated with her family, especially her mother because she often came to the foundation and brought Marni's favorite snacks. She also often had phone calls with her brother in North Lombok.
