

Peduli Anak Foundation
Counselor's Quarterly Report

Name	Abdul Rahman
Date and Place of Birth	Jago, 17 February 1999
Mentor	Amiruddin S.Sos.I
Evaluation Time	April - June 2015
Class	10 Senior High School
Child ID	PA-A0015

Physical Condition

Rahman's physical condition was good for the last three months and he never got sick. His weight is 52kg and his height is 159cm now. Rahman has a good rest everyday and he also diligently exercises to maintain his health. He has a good appetite and always eats in enough portions three times a day. Rahman is still not able to maintain the cleanliness of his body and still needs to be reminded to take a shower by the counselor.

Mental Condition

Rahman's mental condition was frequently changing during the past three months because he was often grumbling when the counselor questioned him why he was late to school or to the mosque for praying. It also happened when he lost his stuff or when his friends use his stuff, but he can be a humorous boy when playing with his friends.

Social Interaction

Rahman's social interaction with his friends is good because he has good sense of humor. But sometimes he made the counselor upset because he was not motivated in doing his daily chores. His relationship with other staff was good and he could quickly give a hand when the staff needs his help.

Educational Development

Rahman's motivation was decreasing and he often missed the class because the schedule is often changing. He did not use the bicycle anymore and he would ask his friends to pick him up to the foundation or he would walk to his school. Rahman passed the semester exam and he will enter the 11th grade in next semester. He did not join in any extracurricular activity at school, while in the foundation he joins English class taught by volunteers.

Family

Rahman got a visit from his father three times during the past three months.
